

KONE DESTINATION

KONE Destination

Provides intuitive and efficient way for people to reach their destination floor.

- KONE Destination is a Clean and robust solution with dynamic and customizable user interfaces. It offers an architecture with built-in connectivity and possibility for third party integrations
- It helps to facilitate optimized people flow and increased traffic handling performance in your building.

EFFICIENCY

- Direct call to home floor by swiping your access key or mobile key
- Easy and fast to operate even at peak hours to manage high traffic efficiently

USER FRIENDLINESS

- Intuitive and flexible user interface
- Accessibility of different users is catered by adhering to major code compliances

PERSONALIZATION

- Activate personal menu which allows changing call types and accessing floors in your profile
- The guidance mode to elevator can be configured based on user needs e.g. for tenants, regular visitors & guests

DIFFERENTIATION

- The variety of hardware colors and options for user interface customization in Destination 1020 promotes unique identity of the building
- The system architecture allows easy possibility to display individual brands at each floor depending on tenants preference
